CATALOG 15

This catalog supersedes all previous issues

Terms

2% fifteen days. Net cash sixty days, or ninety days' trade acceptance. Positively no discount allowed after fifteen days.

It will save time and expense to parties with whom we are unacquainted if they will send money order or satisfactory reference with order.

Delivery

All goods shipped F.O.B. Newark, N. J. In no instance do we allow a deduction for transportation charges.

We make no charges for cases.

All claims for errors must be made upon receipt of goods. All goods are shipped at purchaser's risk; our responsibility ceases after obtaining shipping receipt.

Prices

KEEP THIS CATALOG. It will not become out of date, as up-to-date price lists will be issued as necessary. Write us from time to time for latest prices for Catalog No. 15, stating date appearing on cover of price list you have.

RUBBERSET COMPANY, LTD.
Toronto and Gravenhurst, Canada
Known and Recognized by the Trade and Public as the Best There is in Brush Construction

The Principle of Rubberset construction is many years perfect. As an invention it is without precedent or parallel. A Rubberset brush, whether it be a shaving brush, tooth brush, nail brush, complexion brush, hair brush, or paint brush, is emphatically the best of its kind.

There is not a poor quality even at the cheapest price. The buyer of the Rubberset brush line is not dealing in speculative sellers of a questionable value—it is merely a matter of buying the right quantity of each grade, and keeping their sale permanently before the notice of the trade.

The First Shaving Brush Advertised

Rubberset quality plus many years of progressive advertising has lifted the shaving-brush department out of the indefinite “hodge-podge” sort of selling into a stable, established, dependable, and well-in-demand feature in every store where they are handled.

All attempted Rubberset imitations can do no more than claim to be like them. And there’s certainly no reason why any merchant should try to sell these imitations when there is vastly more profit and safety in the real articles.

You have, or should have, the complete Rubberset line. Give them the chance to make all the profit they can make for you. Don’t just keep them in case they are called for. Urge that they be called for. No other articles in your store have such strong and interesting talking points.

This huge brush organization, unequalled in size, in modernness, in skilled labor, guarantees the perfection of each article. The name Rubberset on a brush is our “O. K.” mark of production. Look for it—remember it—be guided by it, and if you don’t see it, just reflect the fact that it isn’t a genuine Rubberset.
The Original and Only Shaving Brush Made by the RUBBERSET Process

The Name
"RUBBERSET"
on the Brush is the only stamp of genuineness

The "Reason Why" the Bristles in a RUBBERSET Never Come Out

The butt-ends of the bristles are first embedded in a solid head of soft rubber. This head is then bound with a strong metal belt and placed in a die and vulcanized (to the hardness of flint) under heat and pressure. The result is a solid vulcanized head in which the bristles are so thoroughly anchored that it retains every single bristle until the brush wears out.

It is physically impossible for bristles to escape the everlasting hold gained by the original RUBBERSET process. It is impervious to all effects of wear and time, and only the life of the bristles themselves, which must wear to a butt, can mark its discontinued utility.

RUBBERSET makes good—or WE WILL!

Packed in Individual Boxes

EACH RUBBERSET Brush—irrespective of price—is packaged in an individual, dust-proof, sanitary carton. Each brush leaves the factory sterilized and aseptically clean—it reaches your customer in the same condition. This is a great selling point. RUBBERSET Brushes are not piled in "bins" or "hodgepodge" on counters to catch dust, dirt, and germs. They are not handled a hundred times before your customer makes his purchase. The style and quality of brush desired is selected from a handsome display case. Each carton is marked with the style brush it contains. This also keeps your counters from being littered and uninviting—keeps your goods in perfect condition—and the cartons lend themselves admirably to effective and attractive counter and window display. These individual boxes are packed in large cartons holding a dozen each, and saving much space.
Specially Boxed Brushes

The higher-priced RUBBERSET Shaving Brushes are great sellers at Holiday times or as Birthday Gifts. There is nothing more acceptable to a man—and the beautiful gift-boxes we supply dealers for the gift seasons give a setting which perfectly expresses the spirit of the occasion.

You will find a steady demand for these more luxurious RUBBERSET Brushes all the year round. They will be the most popular man’s present in your store. And as a display feature, a window-trim of RUBBERSET gift brushes catches every eye. In your show cases or on your counters RUBBERSET brushes will brighten up your entire toilet accessories stock and lend a decorative air to the whole department.
Barber’s Neck Dusters

Number 650

These serviceable dusters are made by the RUBBERSET process of gripping the bristles in hard rubber. They are made of high-grade material and cannot fail to give maximum service.

Number 660

Special Barber’s Hair Brush

Number 1426

This brush is most popular in shops where fresh brushes are used with every customer. Repeated sterilizing will not injure the finish, nor cause the stiff penetrating bristles to soften or come out.

Straight, narrow, walnut back, 1¾" wide, high or dull finish. Best stiff black bristles.
The first safety tooth brush—the tooth brush that cannot shed a bristle. Tooth brushes have gone along year in and year out through a century of making, with here and there an improvement in the shape, a difference in handles, or a variation of bristles; but no maker, until the RUBBERSET COMPANY produced RUBBERSET Tooth Brushes, ever solved the vital problem of eliminating bristle shedding.

This feat is completely accomplished in RUBBERSET Tooth Brushes because the marvelous principle of gripping all the bristles in hard vulcanized rubber is the basic principle of every RUBBERSET Tooth Brush.

We give the finest bristle quality; the most approved and scientifically perfect shapings of tufts and bristles; white ALBERITE handles in various shapes for all likings.

To insure the most attractive and cleanly method of selling, each brush when completed is thoroughly sterilized in the factory, individually boxed, and each box sealed to guarantee the brush reaching its user in germ-proof, perfect condition.

Nail Brushes

A RUBBERSET Nail Brush is something more than a bunch of bristles and a block of wood. It is an indestructible brush made for service and guaranteed to make good—or WE WILL!

Some of the handles are beautifully finished specimens of Alberite in pure white, and cannot discolor, chip, crack, or break. Others come with genuine black walnut handles which are absolutely waterproof and will withstand the hardest usage.

The bristle part of the inner structure of each brush is a solid bed of hard vulcanized rubber. This is covered with a layer of Alberite, so that the brush can be kept thoroughly clean and strictly sanitary.

The bristles are set in rows, much after the formation of the proper tooth brush; stiff enough to be penetrating under the nails, and yet as easy to the tenderest skin as the most delicate hands require. Each brush is individually boxed in an attractive carton, so as to always insure its freshness.
Nail Brushes

White Alberite handle, seven rows of best white bristles, gripped in hard rubber.
Hair Brushes

The same principle of brush construction which has made famous the name RUBBERSET is, of course, practised in the manufacture of RUBBERSET Hair Brushes.

The bristles are everlastingly held in place, at the proper angle, by the RUBBERSET process of gripping every bristle in a vise-like grip of hard rubber. The most strenuous usage will make no impression on the setting, nor cause the shedding of a single bristle.

Every piece of wood that goes into backs and handles is carefully selected from the finest seasoned stock, and beautifully finished in every respect. Each brush is wrapped and boxed separately in a handsome container.

You can recommend RUBBERSET Hair Brushes without reserve. They are guaranteed by us to give absolute satisfaction.

PERFECTION in tooth brush manufacture is expressed in our new ALBERITE. Nowhere can be found a tooth brush of foreign or domestic make more attractive in general appearance.

In every ALBERITE you will find the finest quality of pure white selected French bristle. Each tuft is accurately trimmed and scientifically arranged to give the proper taper, thus permitting easy access to every tooth surface and crevice.

The bristles are held in place in such a manner as to defy the hardest usage, and we guarantee every ALBERITE against bristle shedding.

The white Alberite handle gives the appearance of ivory and adds materially to the sale of the brush.

Each brush is thoroughly sterilized, carefully packed in an individual sanitary container, and reaches your customer a perfect article in every detail.

Every ALBERITE must give your customers absolutely satisfactory service. This we guarantee without reserve.

ALBERITE Tooth Brushes make good—or WE WILL!

A RUBBERSET Paint Brush is the WORLD'S STANDARD

It has been misquoted that RUBBERSET Brushes are expensive; they are by test and experience the most economical brushes made. They are not the cheapest at original purchase price; they are not made with that idea in mind. RUBBERSET Paint Brushes are built for service and give service—they live through the most ravaging wear and tear that a product was ever called upon to endure.

RUBBERSET Paint Brushes are cheapest any way you figure.

They are the product of many years' advancement in the art of paint-brush making. They are not alone wonderful in bristle construction, but in their entirety—incidents like ferrules, like binding, like handles, are all tested, and true quality. Every shape is scientifically right.

Out of more than a thousand perfect variations and specific styles of RUBBERSET Paint Brushes, there isn't a poor brush in the aggregation.

A solid bed of rubber holds every bristle in the brush. Our process of vulcanizing this rubber gives it the hardness of flint—no bristle can escape its grip. The brush cannot crack, but, even if it did, the bristle section would remain intact. It has got to wear to the butt and it will be about two times longer accomplishing this feat than any experience any painter ever had with any brush but the RUBBERSET. The construction just laughs at the annihilating effect of turpentine, benzine, alcohol, creosote, oils, lacquers, etc., on ordinary brushes.
TODAY supply a brush that would make home painting a success—that would be a permanent aid in beautifying the home—the RUBBERSET COMPANY have constructed a brush which is called the RUBBERSET Home Brush. The RUBBERSET Home Brush has the same perfect setting which has made the RUBBERSET Shaving Brush—hard rubber. They can be used in anything and cleaned in anything—benzine, turpentine, ammonia, or any other paint remover, without losing a bristle and without the setting being affected in any way, an enormous advantage over all brushes set in cement, glue, rosin, etc. They are made from specially selected China bristles, full, long, and very elastic. They are adapted to the finest class of work, and can be used for painting, varnishing, lacquering, and all purposes for which a brush may be used. Made in five sizes, 1", 1½", 2", 2½", and 3" wide. Every brush fully guaranteed.
ADVERTISING SERVICE

THE RUBBERSET COMPANY Advertising Bureau is at the service of our customers—their assistance will be found valuable in the planning of window displays for which we will supply the materials and ideas. All illustrations of Shaving Brushes, Tooth Brushes, Paint Brushes; and other features of the RUBBERSET lines will be furnished free of charge in whatever style cut or electrotype required. Order the cuts desired by the numbers illustrated in this catalog—state size of cuts desired and state explicitly whether for newspaper, catalog, pamphlet, or circular printing, and the proper kind of electrotypes will be sent to you promptly.

It is very profitable for dealers to coöperate as often and as liberally as possible in order to gain the benefits of our extensive national advertising campaigns. The mere announcement that your store is a source of supply for RUBBERSET Shaving Brushes, Tooth Brushes, Paint Brushes, or our other lines is sure to attract willing buyers to your store.

Don't hesitate to order cuts for your advertising.
